

Postdoctoral Position in Auditory Plasticity

A postdoctoral position is available for investigating the **plasticity of synapses and circuits in the auditory system**. Our lab uses a wide variety of modern techniques including laser photostimulation, optogenetics, and 2-P imaging, to study critical mechanisms mediating developmental and pathological plasticity in the central auditory system.

For further information see <http://www.audres.pitt.edu/people/kandler.php>.

The Kandler-lab is part of a highly interactive auditory neuroscience center, which is embedded in a large and vibrant neuroscience community (<http://www.braininstitute.pitt.edu/>)

Interested candidates should email Dr. Karl Kandler (kkarl@pitt.edu).

Karl Kandler, PhD
UPMC Endowed Professor for Auditory Development and Plasticity
Professor for Otolaryngology, Neurobiology, and Bioengineering
Director of Auditory Research
Department of Otolaryngology
University of Pittsburgh School of Medicine
Pittsburgh, PA 15261
USA
